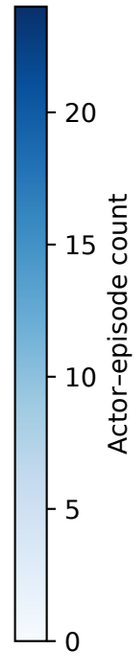
Standards body (n=7)	0	0	0	0	0	0	0
Technology firm (n=14)	0	0	3	0	1	3	2



Labels include no-position, E-only and unknown records; fieldwise classifiable denominators are in the CSV.
Rationales are nonexclusive and count once per actor–episode. Repeat actors across episodes remain separate.
Public authorities and anonymous inputs are excluded. These availability-selected counts do not estimate stakeholder preferences.
